FOR IMMEDIATE RELEASE

Perlick's 'Perl' Faucet Combines Innovation and Quality

MILWAUKEE, WI— Perlick Corporation, the leading manufacturer of innovative total package bar and beverage systems, is proud to introduce yet another innovative addition to their line of products. The new “Perl” stainless steel faucet features an inventive design leaving conventional ideas behind.

“The Perl is a huge success. Its unique design has created an incredibly user-friendly faucet,” says Joe Restivo, Sales Manager – Beer Dispensing Products. “The Perl is much more reliable than other faucets on the market thanks to its distinctive layout.”

The faucet consists of a Perl ball and floating ring design that eliminates the need for a valve shaft. This assures that the beer will not be exposed to air and guarantees no space for mold or bacteria to grow. The polished interior produces a smooth flow and limited foaming. In addition, the Perl faucet has fewer internal parts for better reliability and fewer service calls.

All Perl faucets include a stainless steel handle for strength and sanitation. The Perl faucet is featured at a very competitive price and is offered in a stainless steel or stainless with a gold finish. Other options include a creamer-style faucet and a faucet lock.

Perlick Corporation is a leading manufacturer of innovative total package bar and beverage systems, including custom refrigeration equipment, custom under bar equipment, beer dispensing equipment and brewery fittings that optimize energy use, improve style, and increase durability to help maximize the profitability of any beverage service operation. Perlick employs over 200 people at its 300,000 square foot manufacturing facility in Milwaukee, Wisconsin. To find out more, call 800-558-5592 or visit www.perlick.com.
