Perlick to Launch Industry Exclusive Product Accessories at Dwell on Design 2014

New, innovative accessories provide designers with unmatched indoor and outdoor undercounter refrigeration technology and specification options.

MILWAUKEE – [Perlick](http://perlick.com), a leader in innovative, high quality undercounter refrigeration, will launch a series of industry exclusive product accessories at Dwell on Design, June 20 - 22, 2014 at booth 1461. Engineered to enhance design, function and the Perlick luxury experience, Perlick's new accessories include; Modular Stacking Kits, 650SS Forward Sealing Flow Control Faucet (the world's first flow control beer dispensing faucet for residential use), Martini Racks, and Designer Handles.

"Nearly a century of commercial experience and quality has been engineered into Perlick's residential product line," states Vice President of Marketing and Business Development at Perlick, Tim Ebner. "It's this experience that inspired the innovative accessories Perlick will launch at Dwell on Design, and we are excited to introduce them at the largest design event in the United States."

Launching at Dwell on Design, Perlick booth 1461:

- **Perlick's Modular Stacking Kits:** Unlike the restrictive dimensions of upright refrigeration, Perlick's new kits give designers complete control over each client's specific refrigeration needs. The Modular Stacking Kits are compatible with products in each of Perlick's indoor and outdoor product series' – including the Shallow-Depth Series – creating unmatched customized refrigeration with a flush, modern look from top to bottom.
- **Perlick's 650SS Forward Sealing Flow Control Faucet:** As the first flow control faucet for residential use, Perlick's new, patented faucet will become a standard feature on all Perlick Signature Series beer dispensing products. Inspired by nearly a century of commercial experience, the faucet's sleek appearance is coupled with unmatched technology – in addition to reducing foam, individuals can adjust the flow to best accommodate the beer being poured. And, Perlick's beer dispensers feature industry exclusive air-cooled towers which are essential for proper pours in outdoor installations.
- **Martini Racks:** To accommodate clients' entertaining needs, Perlick is introducing the option of Martini Racks for use with the 24" Indoor and Outdoor Signature Series Freezer. Featuring storage for up to 10 glasses – with the ability to store four martini glasses with drink contents – the racks add a new level of function to Perlick's 24" Signature Series Freezer.
- **Designer Handles:** Inspired by the recommendations of professionals in the design community, a 3/4" bar style pull handle has been added to Perlick's customization options. The new, optional accessory handle can be installed in place of the standard Signature Series handle to better complement surrounding appliances and cabinetry.

Perlick's new Modular Stacking Kit installed with a 15" Signature Series Refrigerator and Refrigerated Drawers – and Perlick's new, patented 650SS Forward Sealing Flow Control Faucet.

Dwell on Design LA is the largest design event in the United States, and will be held at the Los Angeles Convention Center June 20 - 22, 2014. In addition to Modular Stacking Kits, 650SS Forward Sealing Flow Control Faucet, Martini Racks, and Designer Handles, Perlick will be displaying outdoor refrigeration, dual-zone units and a Shallow-Depth wine reserve.
