KEY PRODUCT FEATURES AND BENEFITS

- All Perlick storage cabinets are NSF-certified, so you can feel confident knowing your equipment will meet health code standards.
- Drainboard tops and glass rack shelves are pitched to the drain, so water is evacuated quickly and effectively. With the matching insert, you still get a flat, level space to store your glassware.
- The default option of 'stadium' shaped perforated inserts enable great air flow for efficient glassware drying, maximize glass storage, and are designed to hold up to a busy bar environment abuse.
- Perlick's exclusive field reversible door allows you to change your mind on door swing without ordering any new parts. Option available on single door units.
- Our new, more robust Perlick Quick Clamp leg attachment still features easy tool-less installation.
- Shelving has 1/2" of adjustability from top to bottom, so you can dial in the perfect shelf height for your bar's glassware.

Additional Features:

- All storage cabinets have a bottom shelf, an adjustable intermediate shelf, and a perforated drainboard work surface.
- Swap out the perforated insert for a flat top insert when needs change and you want to use the storage cabinet as a workspace. Available on 12", 18", 24", 30".
- Optional chemical storage pan and optional doors allow you to easily use this unit next to a glasswasher to hold bottles and keep them out of sight. Available on single door units.
- Optional field reversible door available for 12", 16", 18", and 24" wide. All other models have optional two doors.
- Optional doors come standard with a lock set.
- A consistent front rail and backsplash height enhance the line-up appearance.
- Knockouts in the back and lower side of the equipment provide multiple plumbing options.
