KEY PRODUCT FEATURES AND BENEFITS

- All Perlick storage cabinets are NSF-certified, so you can feel confident knowing your equipment will meet health code standards.
- Drainboard tops and glass rack shelves are pitched to the drain, so water is evacuated quickly and effectively. With the matching insert, you still get a flat, level space to store your glassware.
- The default option of 'stadium' shaped perforated inserts enable great air flow for efficient glassware drying, maximize glass storage, and are designed to hold up to a busy bar environment abuse.
- Solid shelves ensure water does not drip onto lower glassware.
- Perlick's glass rack shelves are designed with precisely-located embossments to raise the rack, allowing air flow for better drying and water drainage, and reducing the likelihood of pulling water onto shoes or the floor when sliding glass racks.
- Shelving has 1/2" of adjustability from top to bottom, so you can dial in the perfect height for your bar's glassware.
- Two glass rack shelves are standard and fit standard 20" x 20" glass racks with the option of installing a third shelf to maximize storage space.

Additional Features:

- Optional Perlick Flex Mount leg relocation kit moves rear legs forward for additional space behind the equipment or moves forward legs rearward to help avoid pesky floor drains.
- Swap out the perforated insert for a flat top insert when needs change and you want to use the storage cabinet as a workspace. Available on 12", 18", 24", 30".
- Optional chemical storage pan and optional doors allow you to easily use this unit next to a glasswasher to hold bottles and keep them out of sight. Available on single door units.
- Optional field reversible door available for 12", 16", 18", and 24" wide. All other models have optional two doors.
- Optional doors come standard with a lock set.
- A consistent front rail and backsplash height enhance the line-up appearance.
- Knockouts in the back and lower side of the equipment provide multiple plumbing options.
